

# **Armed Forces Epidemiology Board**

## **Chlamydia Screening Update**

### **INFORMATION BRIEF**

**Lt Col Bruce Ruscio  
Director, Military Public Health  
20-21 September 2005**

# Overview

---

- **Background**
- **DoD Policy**
- **Service Status Reports**

# Background

---

- **AFEB Recommendations**

- “All new female recruit accessions should undergo screening to detect Chlamydia infection.”
  - *This should take place as soon as practical after joining the military.*
  - *Screening within first year of military would also be acceptable and still accomplish the goals of the screening program.*
- “All female military members should be routinely screened for Chlamydia at time of each recommended routine Papanicolaou smear, up until the age of 25 years of age.”
- Appropriate education for all new accession at time of treatment for STDs, and as part of routine military STD training.

# DoD Policy

---

## **DODD 1010.10 “Health Promotion and Disease/Injury Prevention”**

- 1. Support achievement of HHS Healthy People Goals and Objectives**
- 2. The U.S. Preventive Services Task Force (USPSTF)**
  - Clinicians routinely screen all sexually active women aged 25 years and younger, and other asymptomatic women at increased risk for infection, for chlamydial infection.
- 3. The Secretaries of the Military Department shall Implement and evaluate efforts in achievement of Health People goals and Objectives**
